

FESTUS NZUMA

Summary

Experienced Data Analyst and Software Developer skilled in both statistical data analysis and software engineering. Proficient in statistical processes such as research design, data collection, statistical visualization, modeling, reporting, and presentation. Additionally skilled in developing full-stack web applications, implementing machine learning models, and deploying scalable solutions on modern cloud platforms.

Expertise includes Python, Django, React.js, R, and Shiny, with hands-on experience building and deploying machine learning-driven web apps. Skilled in utilizing statistical tools such as SPSS, JMP, SQL, Power BI, Tableau, and Excel. Proficient in Git workflows, including pull requests, code reviews, and version control through GitHub and GitLab.

Familiar with Agile methodologies, including Scrum and Kanban, with experience in sprint planning and task tracking using GitHub Projects, GitLab CI/CD pipelines, and Jira. Seeking opportunities as a statistician/software developer in ambitious organizations to apply expertise and contribute to data-driven decision-making processes.

EXPERIENCE

Jan 2017
|
Present

Data analyst/Software Developer

Fesnic Research Solutions

Machakos, Kenya

Key achievements:

- Delivered 643 projects including; statistical data analysis, machine learning and webapp development projects.
- Performed Thematic Analysis on Ghanaian Breast cancer survey dataset
- Implemented variations of abundance models to estimate birds' population density in coastal new Zealand
- Modelled the impact of video advertising elements on product reach
- Implemented a machine learning based image classification system for detecting covid 19 from chest X-ray scans
- Implemented a machine learning based fake news detection system for countering fake news propagation on social media.
- Implemented a machine learning based American sign language translator for translating sign language video.
- Implemented A Yolo based object detection system for detecting and approximating horse speed on a horse race course

Responsibilities:

- Collect, clean, and validate large datasets from various sources
- Perform in-depth data analysis using statistical techniques and machine learning algorithms
- Develop and implement predictive models and algorithms for accurate predictions
- Create visually appealing data visualizations and reports to present insights
- Provide strategic guidance on leveraging data for business growth

Skills

Statistical Skills

📊 Research Design
📊 Data Collection
⚙️ Statistical Modeling
📊 Visualization
✂️ SPSS, R, Python, JMP, SQL
📊 Excel, Power BI, Tableau

Software Development Skills

</> Full-stack Development
🖥️ Machine Learning
🧠 Deep Learning
🔗 Web App Development (Shiny)
🔗 Django, 📦 Streamlit
☁️ Cloud Platforms (AWS, GCP)
🔗 Microsoft Azure
🔗 JavaScript
🔗 HTML
🔗 CSS
🔗 version control (GitHub and GitLab workflows)
🔗 Agile Development methodology (Scrum and Kanban; GitHub Projects, GitLab CI/CD pipelines and Jira for sprint planning and task tracking)

- Stay updated with the latest data analysis techniques and tools
- Manage projects independently, meeting timelines and deliverables
- Ensure confidentiality and compliance with ethical guidelines and data privacy regulations
- Implement machine learning and AI models, integrating them into back-end systems for production-level applications.
- Design, develop, and deploy scalable web applications using Shiny, Django, React.js, and Streamlit.
- Deployment of Web apps on AWS, GCP and Microsoft Azure.
- Collaborate with stakeholders to understand business requirements and translate them into functional software applications.
- Continuously monitor and improve system performance, ensuring optimal uptime and scalability.
- Manage projects independently, ensuring adherence to timelines and deliverables.
- Apply Agile methodologies, including Scrum and Kanban, to streamline development processes.

Business Relations Officer Trainee

Jubilant Kenya Ltd.

📍 Mombasa, Kenya

Key achievements:

- Disbursed over 200 loans
- Recruited 168 clients
- marketed the company to over 500 clients
- managed 35 group loans
- Trained 26 groups borrowers

Responsibilities:

- Loan application appraisal and issuance
- Loan Portfolio management (collection, recovery, rescheduling)
- Customer relations and marketing
- customer recruitment and training

Projects

E-Learn: Online Statistical Calculators

Developed a comprehensive online platform providing step-by-step statistical calculators for various tests and analyses. The platform can be accessed at: <https://statisticsguru1.shinyapps.io/e-learn/>.

ASX stock analysis webapp

Developed an open-source web app for analyzing, visualizing, and reporting correlations among ASX-listed Uranium and Lithium stocks. The project can be found at: <https://github.com/statisticsguru1/stock-correlapp>.

Small and Medium-Sized Business Management System

Developed an SME management platform that manages inventory, performs shopping basket analysis, and reports business performance indicators (sales, profits, expenditure, etc.).Details of the project are available at:<https://github.com/statisticsguru1/Small-and-Medium-Sized-Business-Management-System>. The Market basket analysis module is available at:<https://github.com/statisticsguru1/Assocs>.

Investment Group Management webapp

Developing an investment group management system that manages savings, merry-go-round contributions, loans, welfare records, sends email reports, and schedules contributions, among other activities. Details of the project are available at: https://github.com/statisticsguru1/Chama_management.git.

More projects are available at: <https://github.com/statisticsguru1>
